

Multiplex install

Case Study

To fit out 2 site buildings for Multiplex on behalf of Elliott Hire Glasgow

One of our biggest customers approached us with a job in Edinburgh to install new furniture for a major contractor. The contractor Multiplex was commissioned to build an extension on to the Royal Edinburgh Hospital and required furniture for their modular site buildings.

The job was huge so it needed the best possible team to go down and make sure it all ran smoothly. Six lads stopped out for a week, and we had 4 lads travelling up and down in 2 Lorries delivering the rest of the furniture. The furniture list consisted of 103 desks, 84 canteen units, 145 drying room benches and 600 mesh lockers.

The end result was fantastic, Multiplex were impressed with the full service and praised the install team for their hard work. They also said the lads kept the buildings very tidy and everything ran like clockwork.

I just wanted to reiterate my earlier thanks to you and the install team for a job very well done. The entire team on site were professional and courteous at all times, their work effort was outstanding and they are a true asset to your business. I would not hesitate in using your services again.

Morag Scott - Elliott Glasgow

Customer:

Challenge:

Fit out 2 modular site buildings

Solution:

Face to face meeting, bespoke design, supply and install new office site furniture.
