

### Customer case study - full design, refurb and installation for three brand new commercial office buildings

We were approached by Payzone, who provide Payment Solutions to small businesses across the UK. The task was to help them move into 3 brand new premises with refurb/fit-out budget of £250k. Our job was to create the ideal working environment for the Team. We was chosen from other similar supplies because they did not offer a total managed solution. From the word go we understood the brief, very quickly we engaged with Payzone and suggested some refreshing ideas which helped in the longer term plans.

The project involved everything from cabling, kitchen/toilet/room construction and decorating through to the supply and fitting of carpets, office furniture and associated products. Ray Nolan, liaised with Payzone and co-ordinated the work, making sure the project came in on time and more importantly on budget.

Inevitably, on projects of this scale, there are bound to be hiccups along the way. Again, Ray and the Team delivered alternative solutions and fast-tracked items to get them back on track. Payzone were highly delighted with the results across all their new offices.

*We are highly delighted with the results across all our new offices and have delivered smart, professional and vibrant places to work for our teams.*

Mark Dann - Payzone

#### Customer:

#### Challenge:

*Help customer move into 3 new premises with refurb and fitout.*
